Work Space. Deconstructed.

The office has been changed tenfold with the rise of the new generation entering the work force. The dynamics have changed - there's more flexibility, freer code of conduct, more customization as well as personalization within the four cornered rooms. For the Gen X and Millennials, work is part of their personal lives; the office, an extension of their home. The office represents not only their job, but also serves as their daily sanctuary where comfort and conduciveness are essential for productivity and inspiration. Old rules are meant to be broken... for the better.

SLATE is a fine-grained, foliated, homogeneous metamorphic rock derived from an original shale-type sedimentary rock composed of clay or volcanic ash through low-grade regional metamorphism. Its texture is the finest of its kind.

SLATE/Mica • SLA209
SLATE/Magnet • SLA145

Slate

Raw like gravel on the sidewalk. This STONE style set is solid in color, meant to be obscure and give emphasis to the interior design elements and bounce back light sources to give the room its effervescent glow.

Slate in Mica

POLISHED CONCRETE is inspired by industrial floors, where heavy-duty machines are used to gradually grind down a concrete surface to the desired degree of shine and smoothness, similar to sanding wood.

POLISHED CONCRETE/Scoring • PLC67
POLISHED CONCRETE/Polish • PLC144

Polished Concrete

Bright and invigorating. This STONE set features naturally formed patterns with a polished finish. It amplifies the sense of lightness in a room, pumping up the energy for fruitful discussions.

Polished Concrete in Scoring

ARTS AVENUE is inspired by travertine, a terrestrial sedimentary rock, formed by the precipitation of carbonate minerals from solution in ground and surface waters, or geothermally heated hot-springs.

Arts Avenue

ARTS AVENUE/Fairmount • ASA209
ARTS AVENUE/Boathouse • ASA180
ARTS AVENUE/Logan • ASA153

Arts Avenue

The right environment breeds creativity. This STONE style set features marble-like patterns in muted colors that easily make the surroundings pop; its subtlety makes it a good choice for artistic work spaces.

Arts Avenue in Fairmount

PORCELAIN derives inspiration from faux marble or ceramic tiles, created to mimic the look of natural stone. To the untrained eye, some high quality porcelain tiles look and feel incredibly like natural stone.

PORCELAIN/Cream • POR48

Porcelain

Grand but not overbearing. This STONE style features porcelain-like floorings that elevate a room or a hall with a new type of sophistication, one that is aspiring and down-to-earth at the same time.

Porcelain in Cream

CHALKBOARD is inspired by basalt rocks which are formed from the rapid cooling of magnesium-rich and iron-rich lava exposed. Do you know that more than 90% of all volcanic rock on earth is basalt?

CHALKBOARD/Iron • CKB5
CHALKBOARD/Meta • CKB133

Chalkboard

No frills, no pretensions. This STONE style set is more on the rustic side with its rough edges serving as its main appeal. Perfectly suits a laid-back setting where everyone can take a breather.

Chalkboard in Meta

The inspiration for **TANGIBLE** comes from industrial factory floors and skate parks striated from wear which in turn gives the surface unique markings.

TANGIBLE/Dawn • TGB6
TANGIBLE/Twilight • TGB250

Tangible

Playful and welcoming. This STONE style set impresses with its smoothness and friendly undertones - a refreshing sight to see after a long day.
